ABSTRACT

The 1998-99 school year marked the 19th year of statewide student testing under the Arizona Student Achievement Program. In this school year, students were tested using the Stanford Achievement Test, Ninth Edition (Stanford9). This test was administered to 593,872 Arizona students in grades 2 through 11 during the spring of 1999. Three subtests in reading, language, and mathematics were administered at all grade levels. This document provides school, district, county, and state level scores representing typical student performance. Sections A, B, and C of this report provide separate scores, one for each subject tested. The three scores cannot be averaged to provide one overall score for a school, district, county, or the state. They are percentile rank scores that indicate the estimated percentage of students nationally scoring equal to or lower than the average performance indicated for a school, district, county, or the state. These scores are presented in table form, one lengthy table for each of the three subtests in reading, mathematics, and language. (SLD)

INDIVIDUAL PERCENTILE RANK SCORES BY SCHOOL, DISTRICT, COUNTY AND STATE Grades 2 Through 11

A.	Reading	1A-52A
B.	Language	1B-52B
C.	Mathematics	1C-52C

Introduction

This is the nineteenth year of statewide student testing under the Arizona Student Achievement Program. To fulfill the requirements of the Arizona Revised Statutes Section 5-741 through 744, a nationally standardized, norm-referenced achievement test in the subjects of reading, language and mathematics must be adopted and implemented for use in Arizona schools.

For the 1998-99 school year, students in grades 2 through 11 were tested using the *Stanford Achievement Test*, Ninth Edition (Stanford9). This test was administered statewide to 593,872 Arizona students in grades 2-11 during the spring of 1999. Three subtests in the academic content areas of reading, language and mathematics were administered to all students.

This *State Report Appendix* provides school, district, county and state level scores representing typical student performance on the 1998-99 administration of the Stanford 9. Sections A, B and C provide separate scores, one for each subject tested. The three scores cannot be averaged together to produce one overall score for a school, district, county or the state. The scores are called *individual percentile rank scores* and indicate the estimated percentage of students nationally scoring equal to or lower than the average performance indicated for a school, district, county or the state.
